**TRIP**, a consumer web site devoted to educating the public on “Traveling Responsibly, Informed, and Protected” has introduced a new TRIP SAVVY Quiz to gauge travelers’ knowledge of everything from “Exchanging Money in a Foreign Country” to “Avoiding Motion Sickness on a Plane.”

The quiz can be found on the TRIP website ([www.trip.ustia.org](http://www.trip.ustia.org)) where readers can also find more than 100 travel articles and tips such as:

An initiative of the [US Travel Insurance Association](http://www.ustia.org) (UStiA), TRIP was created to empower people to travel safely. The site is a one-stop resource, containing news items, helpful links, reader polls, and a constantly updated content library searchable by keyword. The site was launched in response to a survey conducted for UStiA, where 60% of Americans said that safety and security concerns would influence their choice of an international travel destination. The same survey revealed that 46% of Americans rank health concerns as a factor when choosing a destination.

Being armed with the latest information provides a level of security and confidence for travelers, as does having travel insurance, advises the UStiA. Travel insurance can help protect your vacation

investment in case you have to cancel or interrupt a trip for reasons such as illness or natural disaster. In addition to covering situations such as illness and injury when on vacation, or delayed or lost baggage, comprehensive travel insurance also provides a wide range of assistance services. These can include evacuating travelers in cases of emergency, and help with obtaining replacement passports in case of loss or theft while traveling abroad. For more information on travel insurance and a listing of UStiA members, visit [www.ustia.org](http://www.ustia.org).
